

searchsploit

Searchsploit

Useful to search exploits for services in **exploitdb** from the console.

```
#Searchsploit tricks
searchsploit "linux Kernel" #Example
searchsploit apache mod_ssl #Other example
searchsploit -m 7618 #Paste the exploit in current directory
searchsploit -p 7618[.c] #Show complete path
searchsploit -x 7618[.c] #Open vi to inspect the exploit
searchsploit --nmap file.xml #Search vulns inside an nmap xml
result
```
